# HELLO!

## We are Group 1

We are here to present you our  
project for the course  
Web-scale data management.

# Technologies used

docker

# Flask

web development,  
one drop at a time

mongoDB®

kubernetes

python™

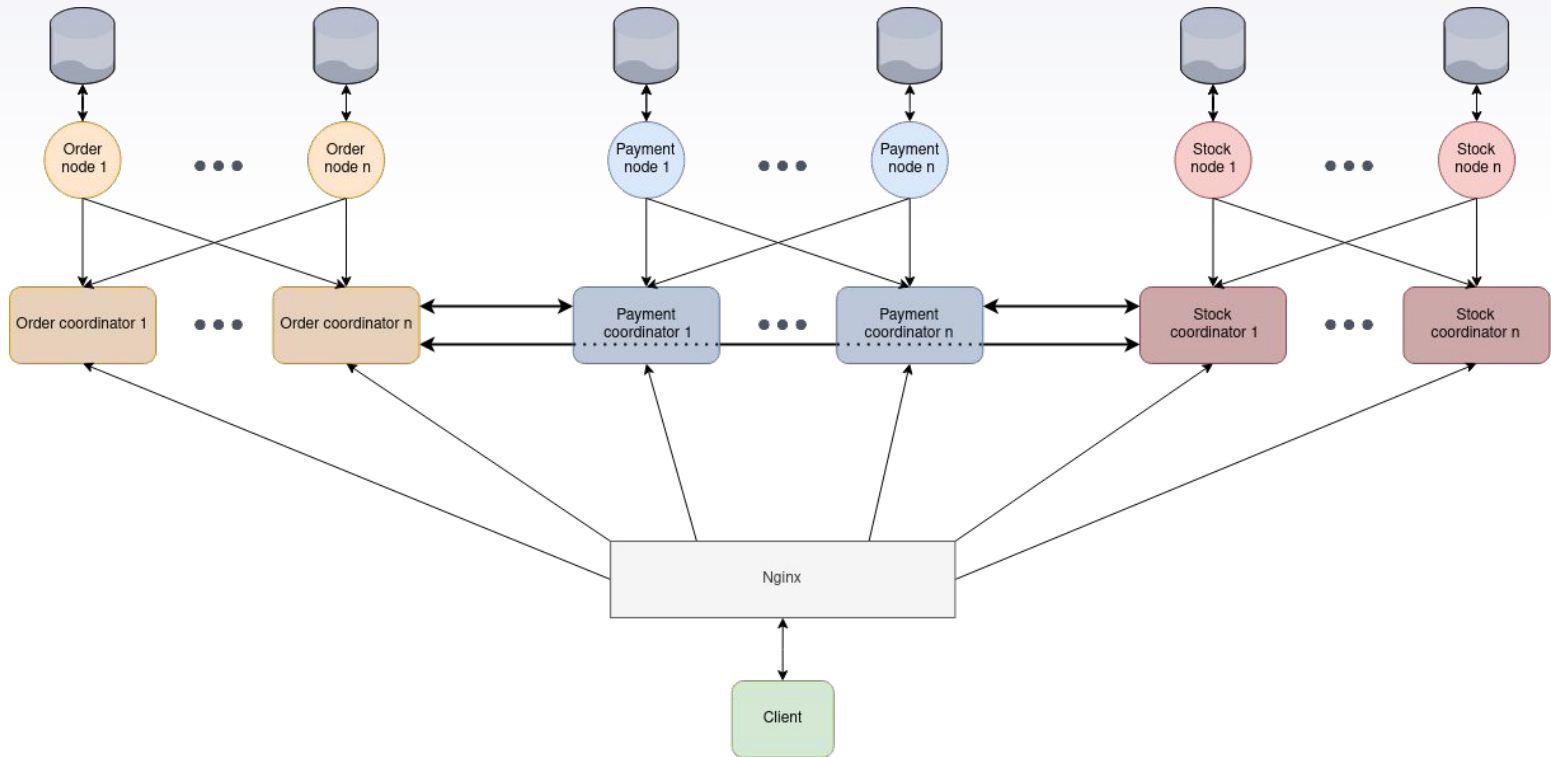

NGINX

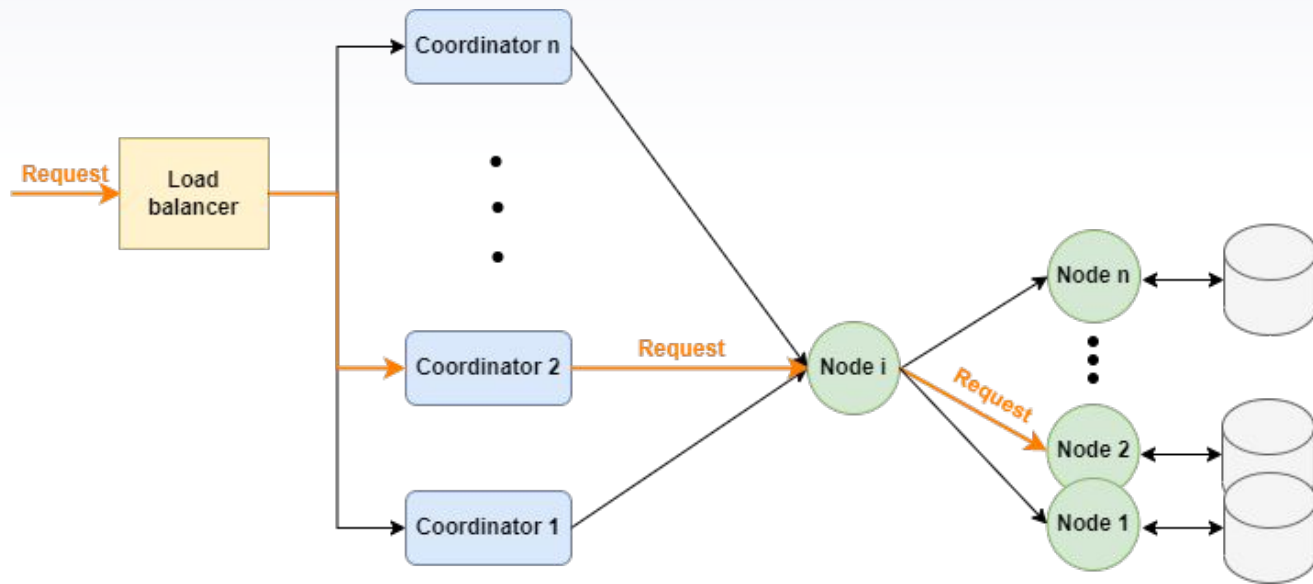

LOCUST

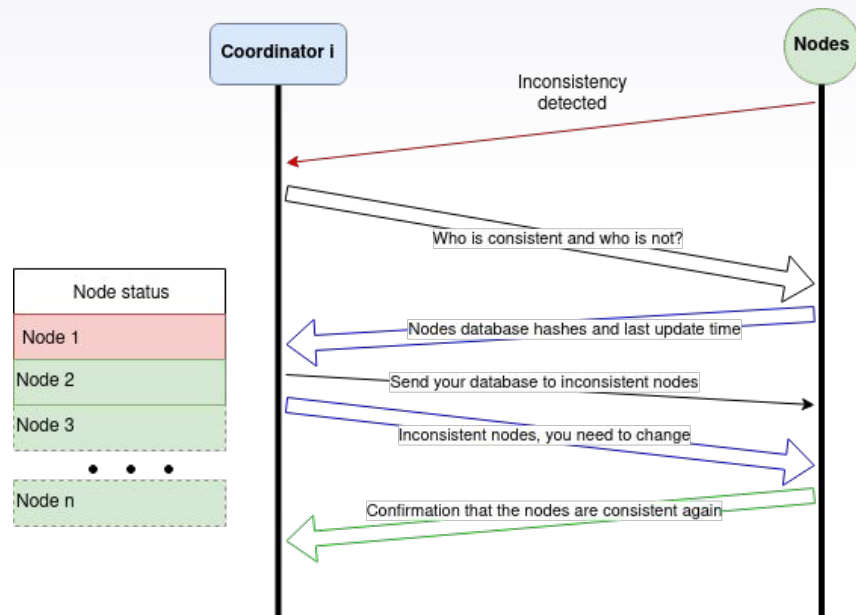

# Design Architecture & Scalability

# ▶ Messaging

# Consistency

# Fault Tolerance

# Our results

## Using 3 nodes and 2 coordinators per service:

100 users

- No failures
- Average response time 2737 ms

1000 users

- Fail rate: 24%
- Average response time 12193 ms

### Consistency:

Stock service inconsistencies in the logs: -100

Stock service inconsistencies in the database: -100

Payment service inconsistencies in the logs: 100

Payment service inconsistencies in the database: 900.0

## Using 1 node and 1 coordinator per service:

1000 users

- Fail rate: 40%
- Average response time 6400 ms

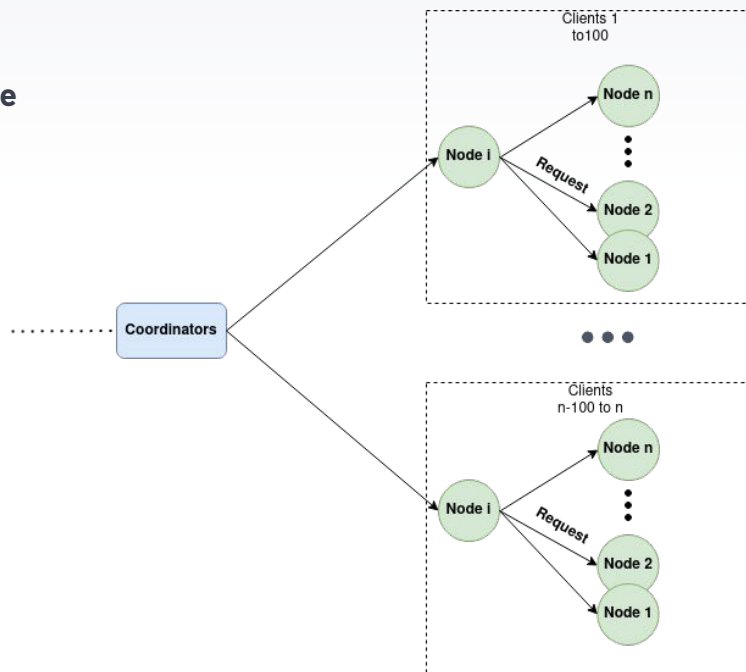

Service actually **crashes**.

# ► Proposal for the future

- + Increase scalability
- + Ensure consistency
- + Reduce response time

# THANK YOU!

## Any questions?
